Case Management Designed With Kansas Prosecutors in Mind

Track, organize, and manage your caseload with efficiency and share information with justice partners — using the same Odyssey® solution platform the Kansas courts are implementing statewide. Odyssey Attorney Manager™ is a fully functional prosecutor case management and document management system with implementation and services designed specifically for prosecutors in the state of Kansas.

Offered as a software-as-a-service (SaaS) solution, Attorney Manager organizes and maintains your case data for hearing and trial preparation, allowing you to review, gather, and track essential information for both criminal and non-criminal case types by using case statuses, witnesses, victims, evidence, statistics, and related case information.

Prosecutors can create charging documents, maintain charge decisions, and track asset forfeitures and protective orders. With secure data measures in place, prosecutors can also track and manage confidential information for the victims they are assisting and ensure pending charges are not viewed by other offices until they are filed with the clerk.

With Attorney Manager, Kansas prosecutors can easily:

- Share information with the court and jail thanks to integrations that seamlessly connect powerful Tyler solutions across departments, agencies, and jurisdictions

- Create an electronic case file by scanning and storing documents, pictures, video, and audio files

- Generate documents, such as subpoenas, notices, and plea agreements using Microsoft® Word, pulling information from both the party and case record into documents without the need to re-key data

- Customize offense code language and configure custom prompts to streamline charging document production

- Batch-update cases and print forms without having to access each case record individually

WITH ODYSSEY ATTORNEY MANAGER, KANSAS PROSECUTORS WILL ENJOY THESE BENEFITS:

- Integration with the courts using our process-driven solution

- Feature-rich case and document management system that streamlines workflow

- Easy, fast, independently managed implementation timed to your convenience

- Standard solutions package tailored for Kansas prosecutors that's affordably priced

- One-time implementation fee and continuous upgrades at no extra costs, so the system always has the latest, most up-to-date features

INTEGRATIONS INCLUDED AT NO EXTRA CHARGE

Some providers charge fees for additional integrations after setting up a case management system. Not Tyler Technologies. With solutions serving nearly half the U.S. population, including 70+ prosecutor offices, Tyler was selected as the Kansas Supreme Court's technology partner to implement Odyssey Case Manager statewide. We are the only solution provider able to offer the same platform the courts are using, with process-driven integrations and automated workflows built-in.

These integrations mean you can connect seamlessly with the Kansas courts to gain access to shared court information, such as hearings, dispositions, and sentencing. You'll also have access to the court clerk's full register of actions for a case with just a single click within Attorney Manager.

IMPLEMENTATION AND SERVICES THAT FIT YOUR NEEDS

Tyler's Attorney Manager solution for Kansas prosecutors is a complete package designed to get you up and running quickly, so you can experience the benefits of an integrated, streamlined system as soon as possible. As part of this standard package, Tyler provides standard code configuration, project management, technical services during the site installation, solution deployment, and staff training 24/7 through Tyler University.

Project management is included at no additional cost to the prosecutor's office — no hidden fees or charges — and the implementation fee is a one-time expense. Through Tyler's evergreen policy, you'll also receive perpetual system upgrades at no additional cost, which means you'll always have the latest features and functionality of Attorney Manager at your fingertips. Also, since the courts and prosecutors' solutions come from Tyler, the process-driven integrations that exist between them will evolve through the Evergreen policy, ensuring you're benefitting from new integration features to come in the future.
